“Two decades of changes in Ohio ESOPs”

This paper is an update of *The Real World of Employee Ownership*, using a new Ohio dataset collected in 2004-2006. For some companies, three waves of survey data, primarily on organizational practices and management, go back to 1986. Survey data is merged with IRS Form 5500 information, allowing predictions to hard data on value of the plan to employee owners.
