Support Services

The Educational Technology Services Team (ETS) works with faculty to design, develop, and support the use of technology as part of the teaching and learning process. Our support services are delivered in collaboration with the HILLgroup (Hamilton Information and Learning Liaisons) and OCC (Oral Communications Center) to provide comprehensive, seamless support to faculty and students before and during a course. These services are designed to provide faculty with feasible course design and appropriate technology integration options. Contact us to discuss your needs and ideas: course-support@hamilton.edu or 859-4877.

Course Project Design and Delivery

Digital Video - Original footage or analytical clips, storyboarding, videography, language of film, capturing, editing, compressing, delivery in many formats

- [Original Video](#)
