M-F 8 a.m. - 10 p.m.
Sa-Su 10 a.m. - 10 p.m.

For Personal Computers

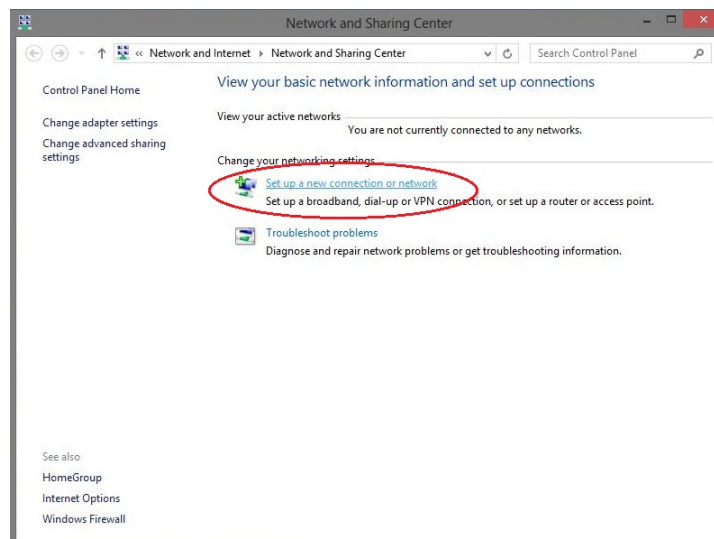

1. To begin, right-click on the **Wireless** icon in the taskbar.

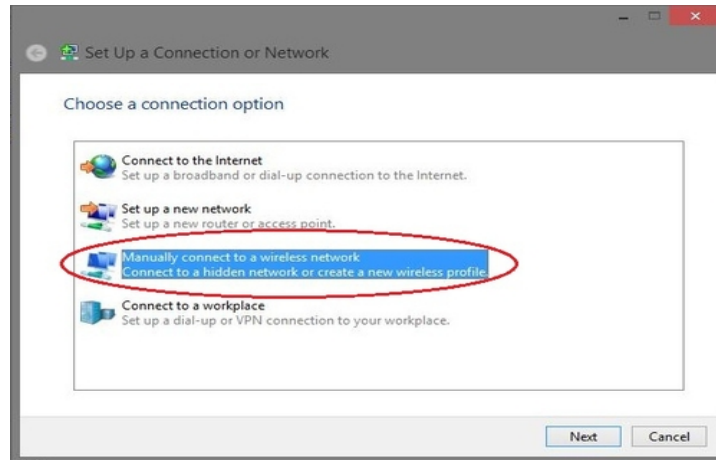

2. Select **Open Network and Sharing Center** in the menu that pops up.

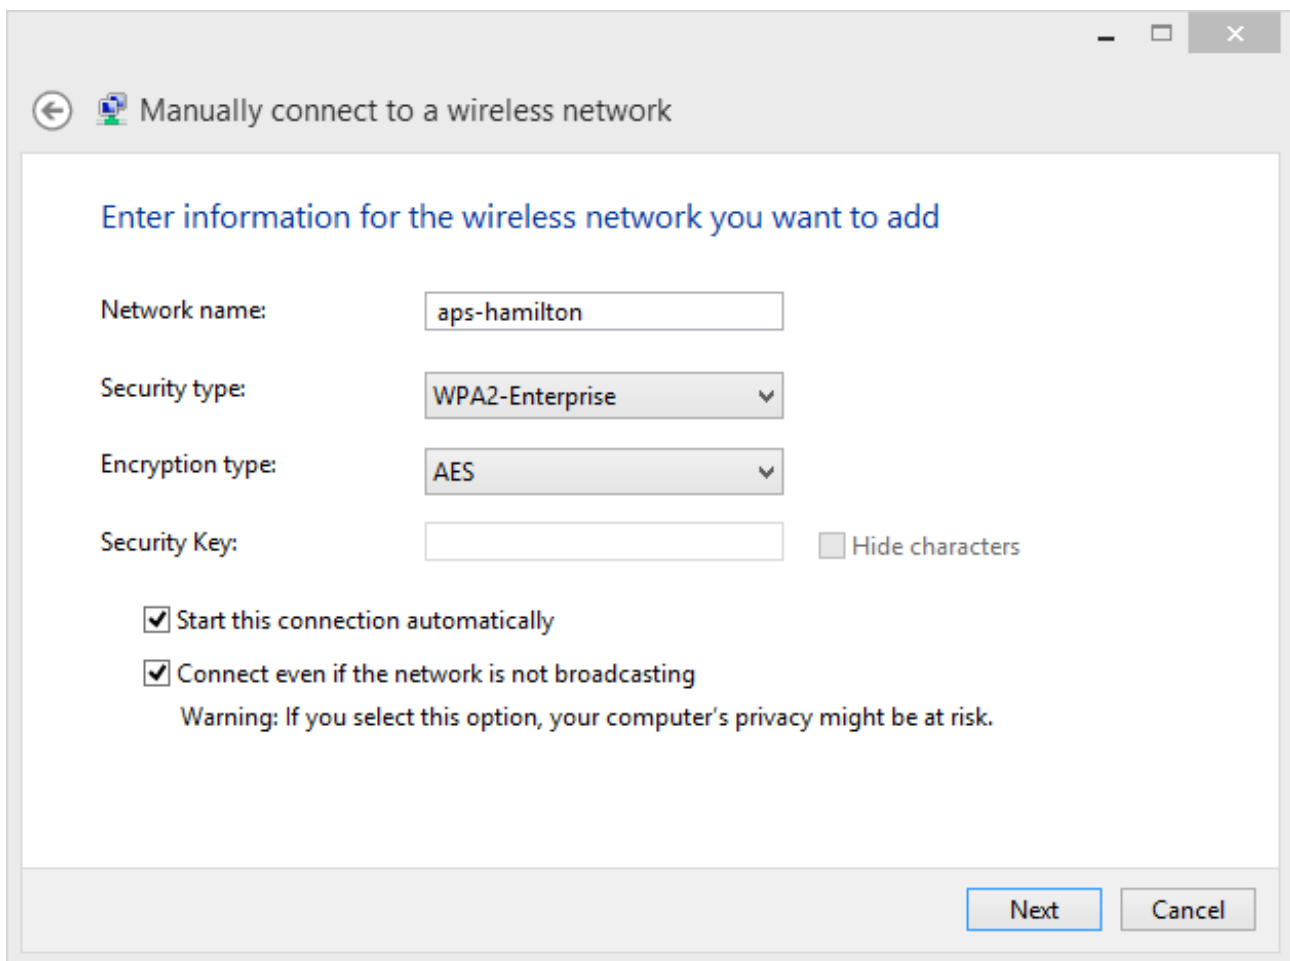

3. In the **Network and Sharing Center**, select **Set up a new connection or network**.

4. Select **Manually Connect to a wireless network** in the window that appears.

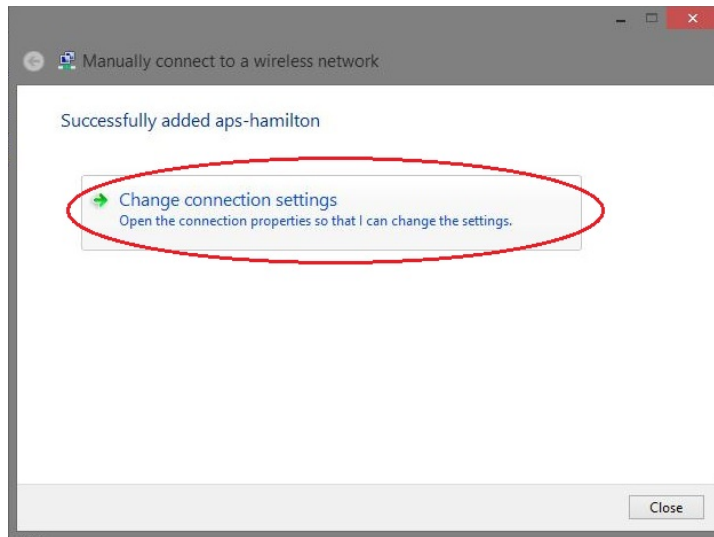

5. In the screen that appears, type *aps-hamilton* in the *Network Name* field and select **WPA2-Enterprise** and **AES** from the pull-down menus. When finished, left-click the **Next** button.

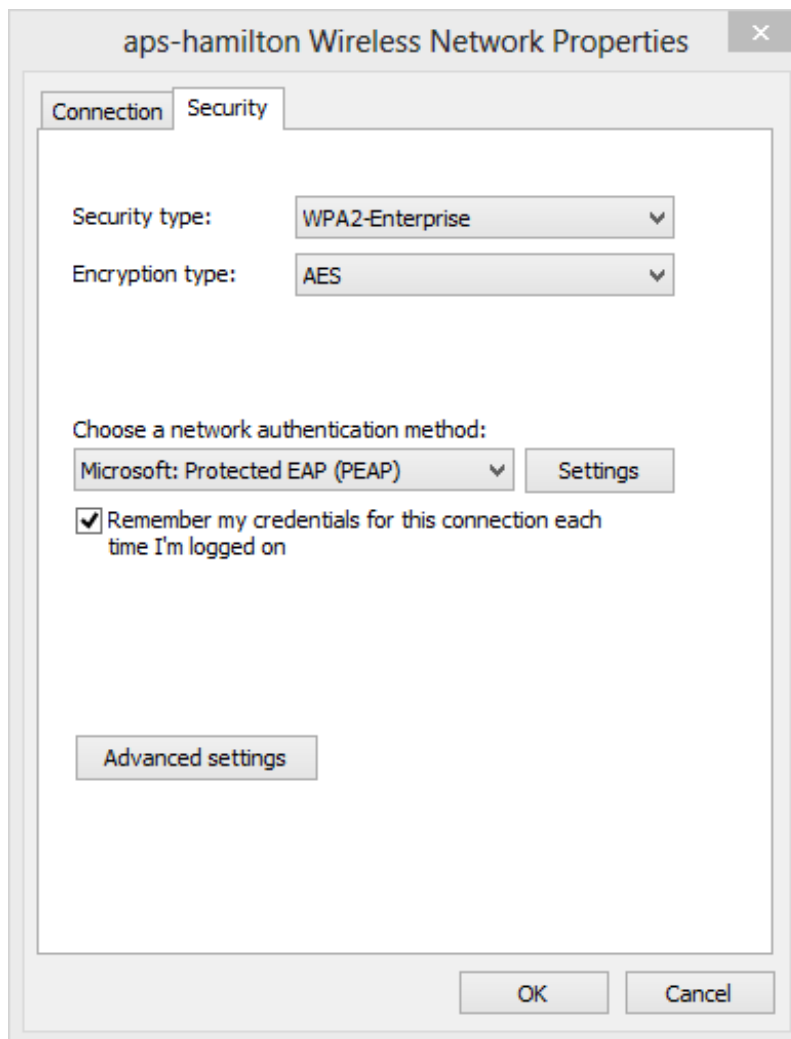

6. Ensure the two checkboxes labeled *Connect Automatically when the network is in range* and *Connect even if the network is not broadcasting its name (SSID)* are **checked**.

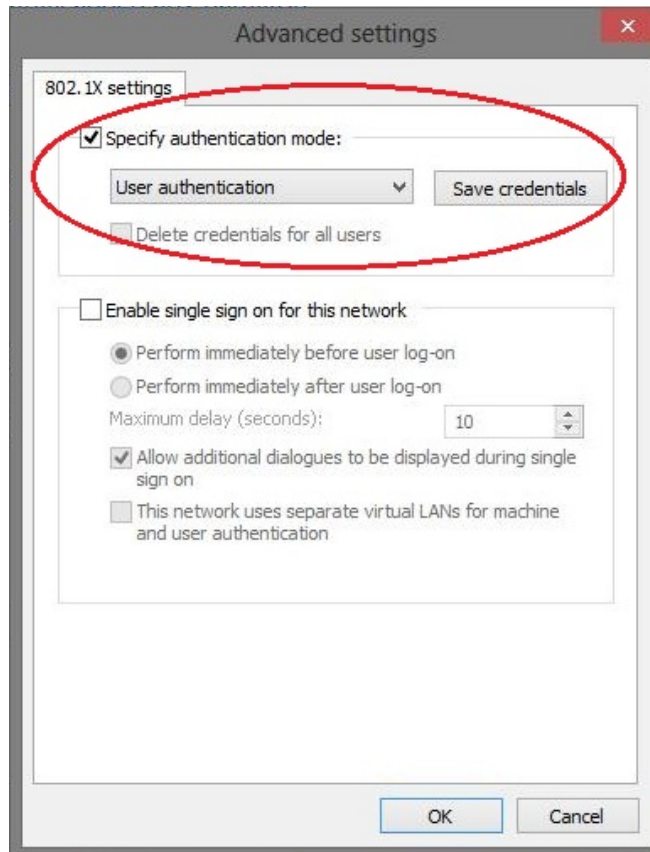

7. After you see *Successfully added aps-hamilton*, left-click **Change Connection settings**.

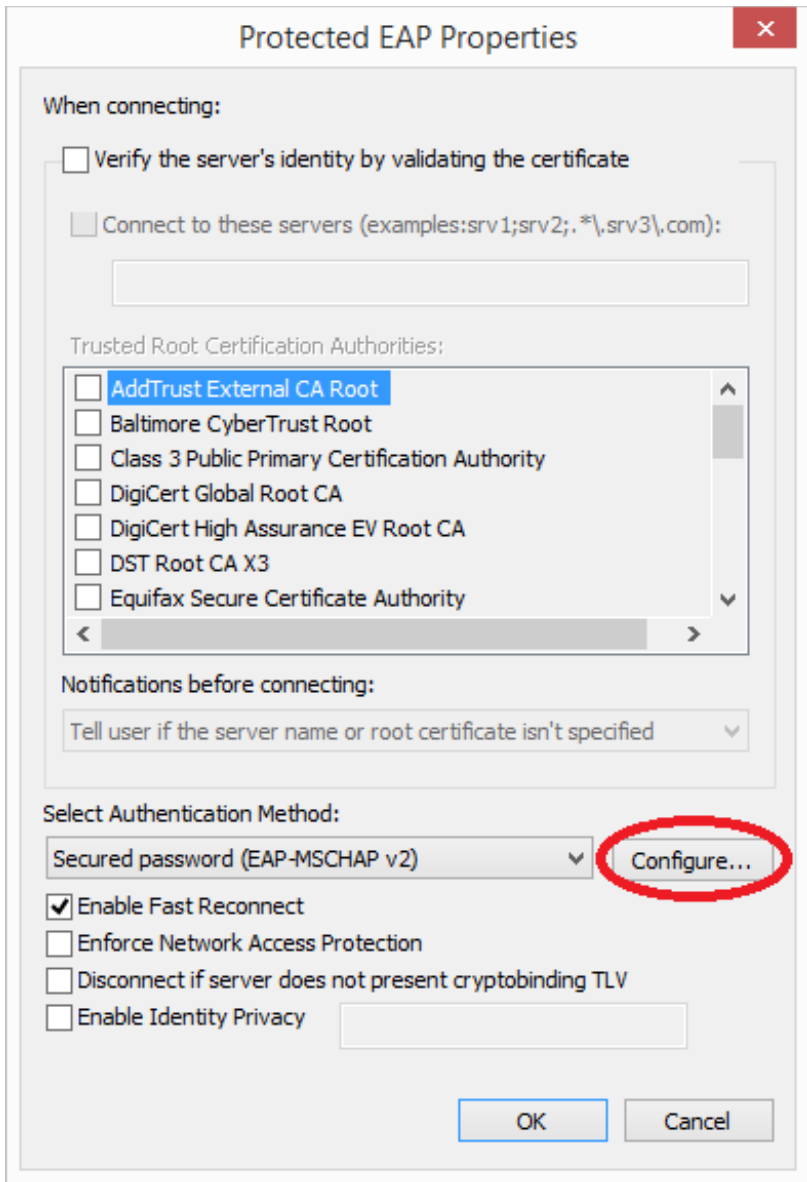

8. In the **Security** tab, check *Remember my credentials for this connection each time I'm logged in*.

9. Click **Advanced Settings**. Check **Specify Authentication Mode**. Select **User Authentication** in the pull-down menu.

10. Click **OK** and you will be back at the **Security** tab from **Step 8**.
 11. Click on **Settings** next to "*Microsoft: Protected EAP [PEAP]*".
-

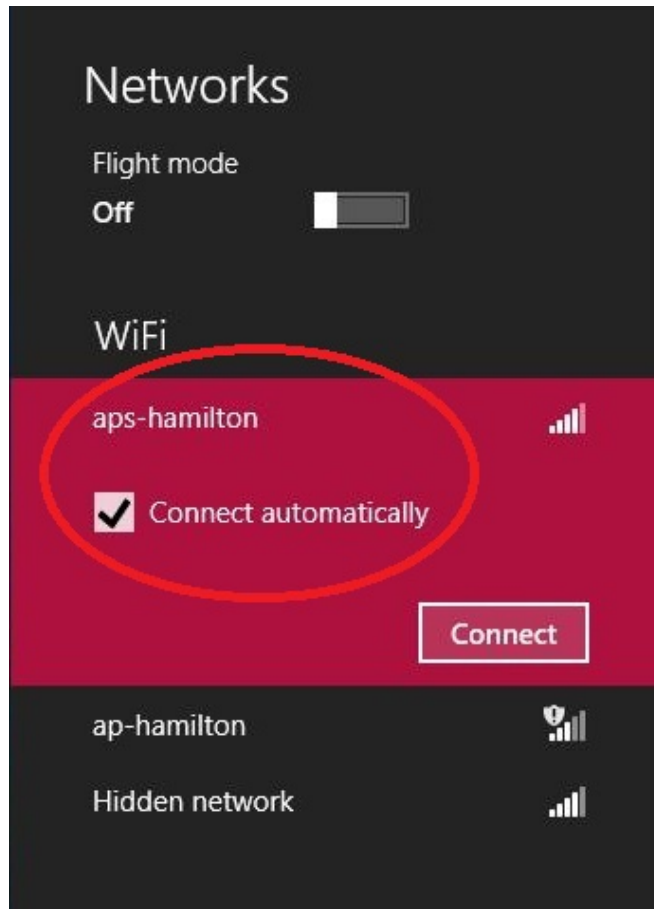

12. Finish by clicking **Configure** next to “*Secured password [EAP-MSCHAP v2]*” **Uncheck** “*Automatically use my Windows logon name and password...*” and click **OK**.

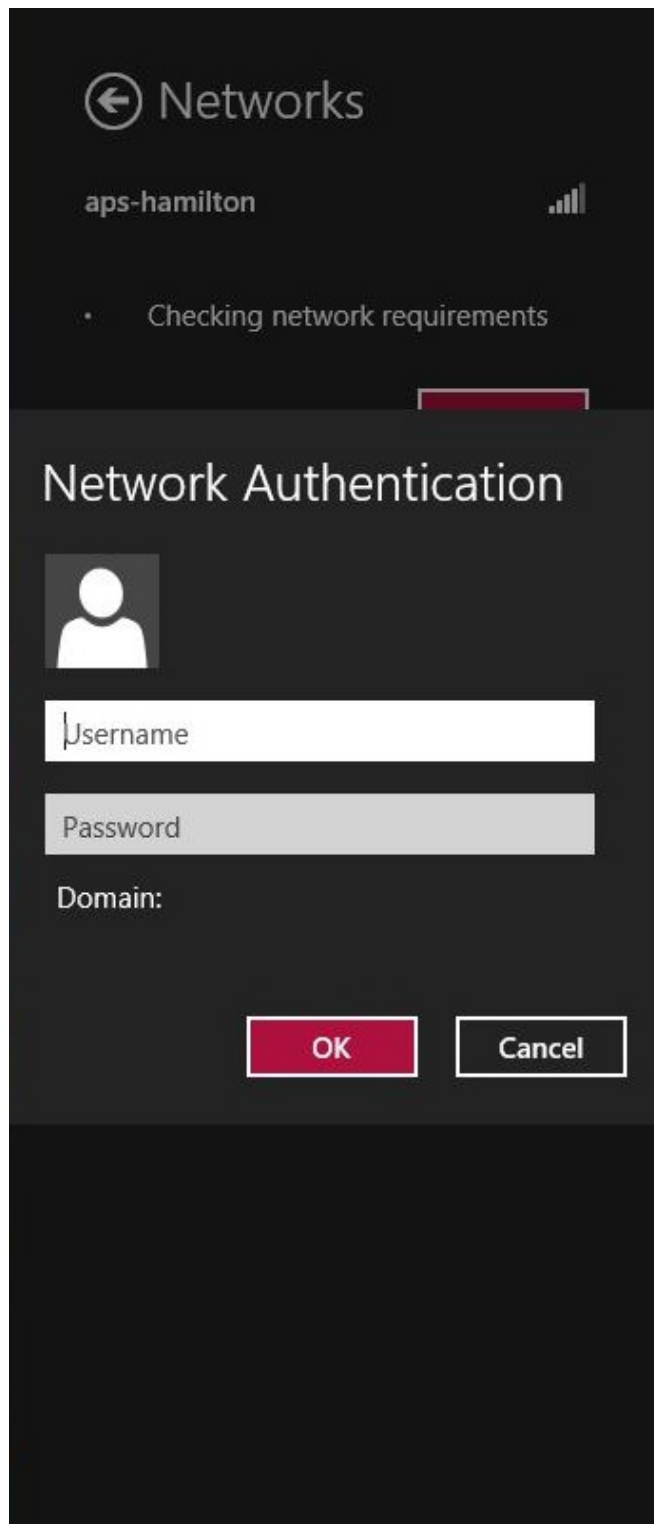

13. Also click **OK** in all remaining dialogue boxes.

14. Your laptop should now detect and try to connect to the *aps-hamilton* wifi network. If for some reason it does not, click on the **wireless** icon in the taskbar. It should now have *aps-hamilton* present in the list of available wifi networks. **Check** the box to **Connect automatically** and click on **Connect**.

15. You will then be prompted to enter your login credentials (your Hamilton username goes in the first field and your password in the second)

16. Left-click on **OK** when finished.

17. You should now be connected to the internet.
