

Installing Sophos from Off-campus Windows 2000, XP, Vista, 7

NOTE: If you are using wireless as your connection to install Sophos the installation will fail. Please connect your computer to a wired connection to install Sophos.

NOTE: If you have other anti-virus software installed on your computer or an older version of Sophos, you **must** uninstall it before proceeding with these instructions. This can be done by going to your **Add or Remove** programs in the **Control Panel**, locate your anti-virus software in the list and click on the **Change/Remove** button.

A. Downloading Sophos

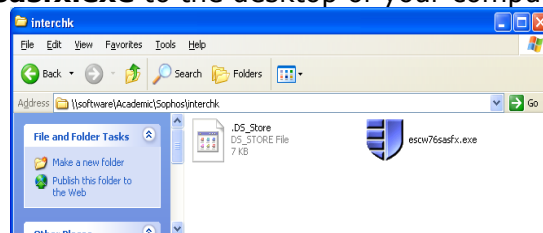

1. Connect to the Internet using your ISP (Internet Service Provider) and then launch Windows Explorer. Go to the **Start** menu, select **All Programs**, then **Accessories**, and then **Windows Explorer (this is not the same as Internet Explorer 7)**.
2. In Windows Explorer's address line type **ftp://software.hamilton.edu**
3. For **User Name** type in HAMILTON-D\USERNAME. Your username is your network ID name.
4. Enter your Hamilton network (ESS/SSS) password in the **Password** box.
5. Click **Log On**.

6. If you receive the following alert, click **Unblock**.

7. Open the **Sophos** folder, and then open the **interchk** folder.
8. Drag the file **escw76sasfx.exe** to the desktop of your computer.

9. Close Windows Explorer.

B. Installing Sophos

1. To install Sophos on your computer see the steps for the operating system you are running.
 - a. **Windows XP** - double click on **escw76sasfx.exe** then click **Run**.
 - b. **Windows Vista** - Right click on **escw76sasfx.exe** and **Run as Administrator**.
2. When the installation wizard appears click **Install**.
3. Click **Next**.
4. Agree to the License agreement and click **Next**.
5. Click **Next** to create the folder

Sophos Endpoint Security and Control installation wizard

Update source
Enter the details required for automatic updating.

Enter the location from which the computer will get updates and then enter details of a user account that can access it.
If you select 'I will enter these details later', Sophos Endpoint Security and Control will be installed, but will not be able to check for updates.

I will enter these details later

Address: Sophos

Username:

Password:

Confirm password:

Access the update source via a proxy

< Back Next > Cancel
