

Building a Foundation for a Career in Education

A HAMILTON EDUCATION is designed to prepare you for a lifetime of personal and professional achievement and satisfaction. Through your coursework and activities, you will develop a broad base of knowledge and skills to prepare you for a variety of career opportunities. However, you will need to take initiative to explore career options and develop career-specific skills. Obtaining an internship is one of the best ways to build a foundation for your career.

Most formal internships are competitive; you should view your first two years at Hamilton as a time to gain career-related experiences to make yourself marketable for a competitive internship following your junior year. Career-related experiences can take place during the academic year as well as during the summer. Your initial summer opportunities will most likely be unpaid, located close to your home, and with a small to medium-size organization. The following are types of organizations and departments you might consider contacting:

- ▶ Summer and sports camp — day or overnight, including those for kids with special needs
- ▶ Adventure tour/teen tour program
- ▶ Outdoor leadership program (Outward Bound, NOLS, etc.)
- ▶ Public school — substitute teaching/summer enrichment
- ▶ Private school with summer school session
- ▶ Town Recreation Department, YMCA or YWCA — sports, recreation and social programs for kids and teens
- ▶ Nonprofit organization with education department or with an education mission
- ▶ Nature and environmental education center, zoo
- ▶ Library
- ▶ Day care center/preschool

Hamilton

Building a Foundation for a Career in EDUCATION

The chart on the right identifies tasks in each of three educational areas. They are progressive, and we strongly recommend that you begin this process during your first two years at Hamilton.

Career-Planning Tasks

The Career Center offers personalized and comprehensive services to help you with the career-planning process.

Career-Related Experience

It is important that you be actively involved on campus as well as use your summers to develop career-related skills and experience.

Academic Preparation

Select courses, a concentration and electives that help you develop creative, critical thinking, writing and speaking skills as well as skills specific to a career in education.
