Collaborative Compositions

Create a line drawing that covers your entire sheet of paper (the drawing can be of something specific or totally random).
Cut the drawing into 3-5 sections. Swap 2-3 sections with your partner and decorate each piece using different materials, colors, and patterns.
Once you are finished, pass your partner’s pieces back to them. See how they fit together.
I really enjoy the depth of these prisms and their unique qualities (like color, shape, and interior fill). They ultimately work well together to make a very geometric print layout.

Here, I was inspired by the geometric asymmetry and the combination of 2D and 3D shapes.
