

## Summer Field Studies Program

### Summer Day Camp Sign-up Form

Please send back this form via email to [accfsk12@hamilton.edu](mailto:accfsk12@hamilton.edu) by **March 14th**.

**Name:** \_\_\_\_\_

**Date:** \_\_\_\_\_

This summer you will be teaching rural children at several day camps. The children will be elementary or middle school students. Preliminary information indicates that they will be groups of 4<sup>th</sup> and 5<sup>th</sup> graders (this detail is subject to change).

Please indicate below your top 3 ideas for the course you would like to teach children at the day camps. We strongly encourage you to propose at least 1 course that contains a creative teaching method. Course content is important, but an interactive and creative teaching methodology is most important. For example, you can choose to teach a course about geography, math, science, art, music or psychology. Most importantly, we encourage you to think of a creative, interactive and fun way to present this content. Remember that we will be in rural areas that will not have much (if any) technological support or equipment available. Please come up with activities that do not require technology. The course activities should be fun for the kids and have simple, easy-to-find, and easy-to-carry course materials. (You will be carrying on your person everything needed to teach and demonstrate the course and its activities.)

Each person will sign up for three courses. Please note that while we will try our hardest to accommodate your number one choice, also be aware that any of the 3 choices you list has a chance of becoming your course. Therefore, we encourage you to list 3 course choices that are of sincere interest to you. Your day camp course does not necessarily need to relate to your project proposal. Please contact us if you have any questions.

A. Subject	B. Short Description of the Content	C. Possible Activities	D. Possible Teaching Tools and Materials
1.			

2.			
3.			

Possible subject courses: 数学, 英文, 科学, 社会, 地理, 美术, 音乐, 体育游戏, 环保卫生.

For some ideas and inspiration from past years, please go to

<http://my.hamilton.edu/academics/acc/FS07Graduation.pdf>

These are by no means subject limitations for this year's program. Please think what you would like to present to the children based on your own interests and experiences and then give us your best ideas. We are looking for unique and creative ideas.
