ME-MADE MAPS

1. Decide what you want to map: your room, your house, your street, your hometown, or another place you know well.

2. Choose a style for your map:
   - Imagine what the world looks like from bird’s-eye view. Draw your map as though you were looking down from above.
   - A view from the ground looking at your map subject.

3. Think of the most important parts of the place you are mapping. Use the markers to add details like buildings & street signs, and places you like to go.

4. Color in your map with watercolor paint.

MATERIALS
- Paper
- Bold Marker
- Watercolor Paint
